

DRAFT CLAIMS**DO NOT ENTER****New Claims:****(A)**

A composition formable into a space saving box for pizza, the composition comprising:

a substantially flat portion having a perimeter defined by opposing longitudinal side edges, a front edge, and a back edge;

a pair of side walls each coupled to one of the opposing longitudinal side edges of the portion;

a front end wall coupled to the front edge of the portion;

a back end wall coupled to the back edge of the portion; and

a transverse score line located between and spaced apart from the front edge and the back edge of the portion and extending substantially between the opposing longitudinal side edges of the portion;

wherein, when the portion is folded along the transverse score line, the portion defines a box for pizza having an outer front wall and a tapering depth that continually decreases from the outer front wall to the folded transverse score line, said box further defining a substantially enclosed interior space for containing one or more pizza slice.

(B)

A space saving box for pizza comprising:

a substantially flat first portion having a perimeter defined by opposing longitudinal side edges, a front end and a back edge;

a pair of side walls each coupled to one of the opposing longitudinal side edges of the first portion,

a front end wall coupled to the front edge of the portion, and

a substantially continuously flat second portion having a front edge and a back edge, said back edge defined by a creased
